Subject: **Representation / Appeal in Support of Delimitation of Proposed Constituency NA-263 of District Pishin**

I have the honor to invite your kind attention to the subject matter in support of draft delimitation of constituency in respect of district pishin. As a Chairman of Municipal Corporation Pishin / Public representative of people of Pishin city and Provincial Deputy Secretary of a political party Pashtoon-khuwa-Milli Awami Party (PKMAP), I appreciate the efforts of Election Commission of Pakistan in making the comfortable and feasible separate national assembly constituency especially in respect of district Pishin. Formation of separate National Assembly Constituency NA-263 for district pishin is appreciable as before that there was one national assembly constituency comprising of two district pishin cum ziarat.

Last composition of constituency of district pishin, as given below was actually not at par with conformity and contiguous. Moreover there was unbalanced population and no sequel boundaries was considered:

**Last composition of Constituencies**

NA-261 (Existing)	Population as per 2017 census
1. District Pishin	736,481
2. District Ziarat	160,422
<b>Total</b>	<b>896,903</b>

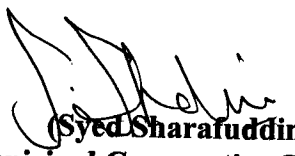

Whereas as the draft delimitation of constituency is very balanced in all respect i.e. contiguity of territorial limits, boundaries, census blocks, circles, charges etc and a balanced population has been considered. The draft delimitation of constituency of district pishin in very feasible and the same should be acceptable to the political parties and people of district pishin. It will be very helpful for free, fair and transparent General Elctions-2018:

**Draft List of Constituencies.**

NA-263 Pishin	Population
District Pishin	736,481

It is therefore requested that the delimitation of National constituency NA-263 of district pishin may be finalized and notified as per draft delimitation of constituency in respect of district pishin. Copies of new proposed maps are attached herewith.
